Dear Chris (Jetbeam KZN)

This letter is just to say thank you very much for introducing Illovo Sugar to the Jetbeam BC 25 torches. We started using the BC 25 in May 2012 at our first operation Kilombero in Tanzania in both factory and agricultural operations which are both very demanding, rugged and extreme to say the least.

To date we have replaced all other brands of torches at five of our operations in Tanzania, Malawi, Swaziland and S.A. Operations. We have not had a single torch or battery fail to date which is unheard of. The torches outperform any of our previous types used and are rugged and in our operations get dropped, submerged in water and exposed to the most severe conditions known.

We did pay slightly more for the Jetbeam torches when purchased, but have no consumable costs as batteries cannot be used for anything except for torches. We have had significant savings on our operating cost and consumables from operational budgets and overall then over short term period the Jetbeam BC 25 works out much cheaper than any of other products used by us.

Your sales advice and service to our operations has been exceptional and I am happy to be contacted as reference for superb product. The savings obtained has now ensured we can roll out the product to all our 14 operations, and to date no failure on over 100 units bought is sure sign of the great quality of the product.

Best Regards

Heinrich Koen
